

Digital Auto Rickshaw Platform

Requirement Clarification & Scope Freeze **Questionnaire**

✧ Thank you for sharing the detailed project requirements..!

Before we finalize the architecture, timeline, and milestones, we would appreciate clarification on the following points to ensure development proceeds smoothly and no assumptions are made during implementation.

1. Parent Tracking & Attendance Module

You mentioned that no separate Parent App is required and parents will access tracking through a QR-generated web link.

Please clarify:

1.1 Attendance Notifications

How should parents receive attendance updates when a student:

- ✓ Boards the vehicle
- ✓ Reaches school
- ✓ Boards for return trip
- ✓ Reaches home

Options:

- ❖ SMS
- ❖ Whats App
- ❖ Browser/Web notifications
- ❖ Other (please specify)

1.2 Parent Access

Should parents:

- Simply track vehicle location?
- View child attendance history?
- View subscription/payment status?

Please specify required features.

2. Customer Ride Flow (Regular Rides)

Our understanding is:

- a. Customer scans driver's QR code.
- b. Customer web page opens.
- c. Driver starts ride from Driver App.
- d. GPS tracks distance automatically.
- e. Driver ends ride.
- f. Fare automatically appears on customer screen.
- g. Customer completes payment.

Please confirm if this flow is correct.

If not, kindly provide the desired flow.

3. QR Code Structure

Please confirm which approach you prefer:

Option A

Two separate QR codes:

- School Ride QR
- Regular Ride QR

Option B

Single QR code:

- System automatically determines ride type and payment routing.

Please confirm.

4. Driver Wallet & Commission Logic

You mentioned future commission deduction from drivers.

Please clarify:

4.1 Wallet Funding

How will drivers add wallet balance?

- ❖ Razorpay
- ❖ UPI
- ❖ Other

4.2 Low Balance Scenario

What should happen if driver's wallet balance reaches zero?

- ✓ Allow rides
- ✓ Block new rides
- ✓ Allow negative balance
- ✓ Other

4.3 Commission Model

Will commission be:

- Fixed amount per ride
- Percentage of fare
- Configurable from Admin Panel

5. School Student Module

5.1 Student Registration

Who creates student records?

- ◇ Admin
- ◇ Driver
- ◇ Parent
- ◇ Combination

5.2 Student Capacity

You mentioned maximum 5 students.

Should this limit be:

- Fixed
- Configurable from Admin Panel

5.3 Route Assignment

Will routes be:

- ✓ Manually assigned by Admin
 - ✓ Created by Drivers
 - ✓ Auto-generated as driver rides
-

6. GPS Tracking & Distance Validation

6.1 GPS Accuracy

Please confirm acceptable distance tolerance.

Example:

- ✓ Exact GPS calculation
- ✓ ± 100 meters acceptable
- ✓ Other

6.2 Internet Loss

If internet disconnects during ride:

Should the Driver App:

- ✓ Continue tracking offline and sync later
- ✓ Pause ride
- ✓ End ride automatically

Please confirm.

7. Fare Configuration

7.1 Admin Panel

Can Admin modify:

- Base fare
- Per kilometer charge
- Waiting charge
- Night charge
- School ride pricing

Please confirm.

7.2 Multi-City Support

You mentioned future expansion.

Should Admin be able to configure separate fare structures for:

- ✧ Bangalore
- ✧ Other Indian cities
- ✧ International regions

in future without app changes?

8. Payment Gateway

School Ride Payments

Payment goes to company account.

- ✓ Razorpay will be used as preferred payment gateway. Please confirm.

Regular Ride Payments

Payment goes directly to driver's UPI.

Please confirm:

Will drivers enter their personal:

- UPI ID
- QR Code
- Bank details
- All/Other

during registration or later?

9. Admin Panel

Please confirm whether Admin Panel should include:

- ✓ Driver Management
- ✓ Student Management
- ✓ Route Management
- ✓ Attendance Reports
- ✓ Payment Reports
- ✓ Wallet Reports
- ✓ Fare Configuration
- ✓ Notification Management

Please specify any additional requirements.

10. Notification Requirements

Should notifications be sent for:

Parents

- ✓ Student boarded
- ✓ Student dropped
- ✓ Subscription due

Drivers

- ✓ Wallet low balance
- ✓ Payment received

Admin

- ✓ New driver registration
- ✓ Failed payment
- ✓ Attendance exceptions

Please confirm.

11. White-Label Future Expansion

You mentioned future expansion into:

- Cab Services
- Delivery Services
- Home Services.

For MVP, should we:

Option A

- ✧ Build only Auto-Rickshaw functionality with scalable architecture.

Option B

- ✧ Build management screens and placeholders for future services now.

✓ *Recommendation:*

Option A (Scalable architecture, Auto-Rickshaw module only for MVP).

Please confirm.

12. Scope Confirmation

To avoid future misunderstandings:

The agreed scope currently includes:

1. Driver Mobile App
2. Parent Tracking Web Portal
3. Customer Ride Web Portal
4. Admin Panel

❖ Modules:

- a. GPS-Based Fare Meter
- b. School Student Module
- c. Attendance Tracking
- d. Payment Integration
- e. Future-Ready Scalable Architecture

Please confirm if anything is missing from this list.
