- ✧ Passenger → Driver UPI
 - ✧ Company receives commission through Driver Wallet deduction
-

10. Multi-Language Support

✓ Static translations:

- English
- Hindi
- Kannada
- Tamil
- Telugu
- Malayalam

11. Advertisement System

✓ Admin uploads:

- Images
- Videos
- Quotes
- Announcements

➤ Display in Parent/Customer Web Portal

Queries Requiring Clarification Before Scope Freeze

A. Parent Subscription Plans

You mentioned:

- 7 Days
- 10 Days
- 30 Days

Please confirm:

1. Are these fixed plans?
 2. Can Admin create new plans later?
 3. Can Parent renew before expiry?
 4. What happens when subscription expires mid-month?
-

B. Leave Carry-Forward Logic

You mentioned:

- Parent must inform 2 days in advance.

Please clarify:

1. How many leave days are allowed per month?
 2. Is there any maximum carry-forward limit?
 3. Does Admin approve leave requests or is it automatic?
-

C. Student Attendance

Please confirm:

1. Attendance marked manually by Driver?
 2. Or GPS-based auto detection?
-

D. Driver Settlement

Please clarify:

1. Driver receives ₹40/day per student?
 2. Does Admin manually release payouts?
 3. Or should system calculate automatically?
-

E. Digital Web Link

You mentioned Customer Web Link.

Please explain:

1. Is it a customer tracking page?
2. Is it a booking page?
3. Is it both?
4. From where will it be generated?

Kindly share expected workflow.

F. Emergency Support Flow

When support is triggered:

1. Which parent should be contacted from the particular group of students picked up by the driver?
 2. Should driver be connected?
 3. Should support team join?
 4. Is call recording mandatory?
-

G. Branch Manager / Supervisor Roles

Please provide permissions for user roles:

- Branch Manager
- Supervisor

Since role-wise access impacts backend architecture and Admin Panel design.

H. Transaction Rating

- You mentioned:
"Rate Transaction"

Please clarify:

1. Is **transaction = completed** ride?
 2. Who is the "Operator" here? Driver or Parent?
 3. If Driver, Can both Driver and Passenger rate each other?
 4. Can Parent rate Driver separately?
-

I. Customer Ride Booking

- You mentioned:
Customer may scan saved QR image and request pickup remotely.

Please clarify:

1. How will customer have scan Driver's saved QR? Using which platform?
2. How will Driver receive booking request?
3. Will live customer location be shared?
4. Is route navigation required?

Technical Constraints / Notes

1. App Size Under 15 MB

This cannot be guaranteed because:

- Maps SDK
- GPS Services
- Razorpay
- QR Scanner
- Push Notifications

significantly increase application size.

We will optimize the application as much as possible.

2. Hyperlocal Ad Targeting

- *Custom ad targeting similar to Google Ads is outside current scope.*
 - Admin-managed banners, videos and announcements are supported.
-

3. Red Alert Based on Review Keywords

- Automatic **AI-based keyword** analysis is **not included**.
 - Red flags can be generated through:
 - Ratings
 - Manual Admin actions
-

4. Play Store Search Ranking

- No developer can guarantee top search position for keywords such as "GLC".
 - Search ranking is controlled by Google Play algorithms.
-

5. Conference Calling

This requires third-party telecom providers such as:

- Twilio
- Exotel

➤ Additional service charges will apply separately.

THANK-YOU

Important Scope Note

The following are considered major modules and significantly impact development effort:

- Parent Portal
- Customer Web Portal
- Driver Wallet
- School Subscription System
- Leave Carry-Forward Logic
- Dynamic Fare Engine
- WhatsApp/SMS Integrations
- Conference Calling
- Advertisement Management
- Multi-Role Admin Panel

After receiving clarification on the above queries, we can finalize the scope and freeze the architecture, timeline, and commercial proposal.
