

GLC - Garrison Rides

Official Requirements & Scope Document

Prepared for: Om Infowave Team | Issued by: GLC Management | Status: FROZEN

Hi Om Infowave Team, please find our final clarifications and scope additions based on the SRS Queries and the recent Addendum v1.1 document. Please treat these requirements as **frozen** and update the technical architecture and commercial proposal accordingly.

1. OFFICIAL BRAND NAME UPDATE

The temporary placeholder 'GLC' is now finalized.

✓ **Official Full App Title: GLC - Garrison Rides**

Please freeze this placeholder scope and proceed with core development.

2. DYNAMIC FARE ENGINE & VINTAGE METER LOGIC

Calendar-Based Pricing:

- **Monday to Friday:** Minimum Base Fare = Rs. 40 for the first 2 KM
- **Saturday, Sunday & Festival Holidays:** Minimum Base Fare = Rs. 49 for the first 2 KM
- **Long Distance Rate:** After 2 KM, +Rs. 2 per 100 meters traveled (= Rs. 20 per KM)

Meter UI/UX Behavior:

- On ride initiation, meter must NOT start from Rs. 0 — instantly display & freeze at active base fare
- Distance tracking starts from 0.0 KM

■ **Meter will NEVER dynamically subtract or fall mid-trip**

Upfront Price-Lock Logic (Driver Shortcut Protection):

- System calculates upfront estimate when destination is selected (e.g., 5 KM = Rs. 100)
- ✓ **Once ride starts, fare is LOCKED — even if driver drops customer at 3.5 KM, full Rs. 100 is charged**

Early Mid-Trip Termination:

- Customer terminates early → app auto-calculates actual distance-based fare (Min Rs. 40 + distance over 2 KM)
- ✓ **No manual input required from driver**

3. INSTANT SHIFT-WISE DRIVER SETTLEMENTS

Split Payout Structure (Per Student/Day):

- **Morning Trip:** Rs. 20 per student

- **Evening Trip:** Rs. 20 per student

- **Total:** Rs. 40 per student per day

Automatic Settlement Triggers:

✓ Driver marks "Reached School" → Rs. 20 instantly credited to bank (API)

✓ Driver marks "Reached Home" → Rs. 20 instantly credited to bank (API)

- Payment Flow: Admin Account → Driver Bank Account (Automatic, No Manual Intervention)
- Purpose: Support daily CNG/Fuel expenses for auto-rickshaw drivers

4. USER ROLES & FINANCIAL ACCESS CONTROL

Super Admin (Owner):

✓ Absolute & exclusive control over all financials & revenue reports

✓ Master dashboards, payment gateway, payout execute & modify

Branch Manager:

✓ Operational access for their specific territory only

- Can manage: local drivers, school routes, parent profiles, Paid/Unpaid ledger view

■ STRICTLY NO access to modify financial settings or execute payouts

Supervisor:

- Access limited to: Driver KYC verification & daily attendance discrepancy handling

■ NO financial access whatsoever

5. CLARIFICATIONS ON OPEN POINTS (A to I)

A. Parent Subscription Plans:

- Admin can dynamically create/modify custom plan durations (7, 10, 30 days, etc.) via Admin Panel
- Parents can renew subscriptions before expiry

B. Leave Carry-Forward Logic:

- Max 5 leave days allowed per month
- ✓ Auto-executes if parent submits 2 days in advance — No Admin approval required

C. Student Attendance:

- Attendance marked manually by Driver via Driver App
- Statuses: 'Boarded', 'Reached School', etc. — for strict verification

E. Digital Web Link (Live Fare Meter):

- QR scan → customer sees live running meter

- On ride completion → displays total fare + Driver personal UPI ID for peer-to-peer payment

F. Emergency SOS Flow:

- Driver triggers SOS → connects to Central Support Team first
- Team handles situation → initiates conference call with Parent group if needed

✓ **Call recording is MANDATORY**

H. Transaction Rating:

- Transaction = Completed Ride. Passenger ↔ Driver mutual rating system

✓ **Parents have separate interface to rate Driver performance (School Module)**

I. Customer Ride Booking (QR-Based):

- Customer scans Driver's saved QR image from phone gallery via any generic scanner
- Web UI opens → Customer hits "Request Pickup"

✓ **Driver receives in-app push notification + customer's live GPS location & route navigation**

6. TECHNICAL CONSTRAINTS ACCEPTANCE

✓ **We accept all technical constraints mentioned in Sections 1 to 5 of the query sheet**

- Includes: App size optimization boundaries
- Includes: Third-party telecom integration costs for conference calling

Please **freeze the final scope** based on these comprehensive requirements and share the final commercial proposal and timeline.

Best Regards,
GLC Management

This document is frozen. All requirements are final as of this version.
